Subject: [External] No fast-tracking the ACP (gas pipeline)

CAUTION: External email. Do not click links or open attachments unless verified. Send all suspicious email as an attachment to report.spam@nc.gov.

I urge you resist pressure from Duke Energy (or others) to approve the ACP, even to short-circuit your own DEQ's approval process.

DEQ hasn't yet reviewed, or finished reviewing the additional information they requested from ACP LLC. I understand the water quality permit is also still under review.

Additional hearings need to be held along the pipeline corridor.

It is particularly galling that this project impacts poor rural counties with no assurance of any real economic benefits, instead, rate hikes.

Fracked gas is not the fuel of the future, and this dangerous white elephant needs to be stopped, for our climate, our clean water, and our farms.
